Pot Holing on Imperial Avenue, between Adams Avenue and Brighton Avenue

A City of El Centro Capital Improvements Program (CIP) Project will begin within the next two weeks to improve an existing sanitary sewer pipeline along Imperial Avenue, between Adams Avenue and Brighton Avenue.

The first phase of the project is to gather field data by conducting potholing activities. These activities consist of excavating small areas to determine the vertical/horizontal positioning of other underground utilities, which may affect the improvement process.

Lane closures are expected, however northbound and southbound traffic will remain open. Lane closures will be Monday through Friday, from 8 P.M. to 6 A.M. to minimize impact to traffic and business operations. The lane closure may impact business driveways, however ingress/egress to businesses shall be made available at all times.

Potholing activities will commence the week of June 14th, estimated through July 10th, 2020. The construction is projected to be completed by December 30, 2020.
